

Battelle Process Modeling Initiative

(Next Generation SBMS)

Introduction for ESH Coordinators and Quality Representatives

*J. Canestro
SBMS Manager*

*Sabine Kessler
BNL Project Leader*

January 16, 2008

**SIXTY YEARS
OF DISCOVERY
1947-2007**

BROOKHAVEN
NATIONAL LABORATORY

Participating Laboratories

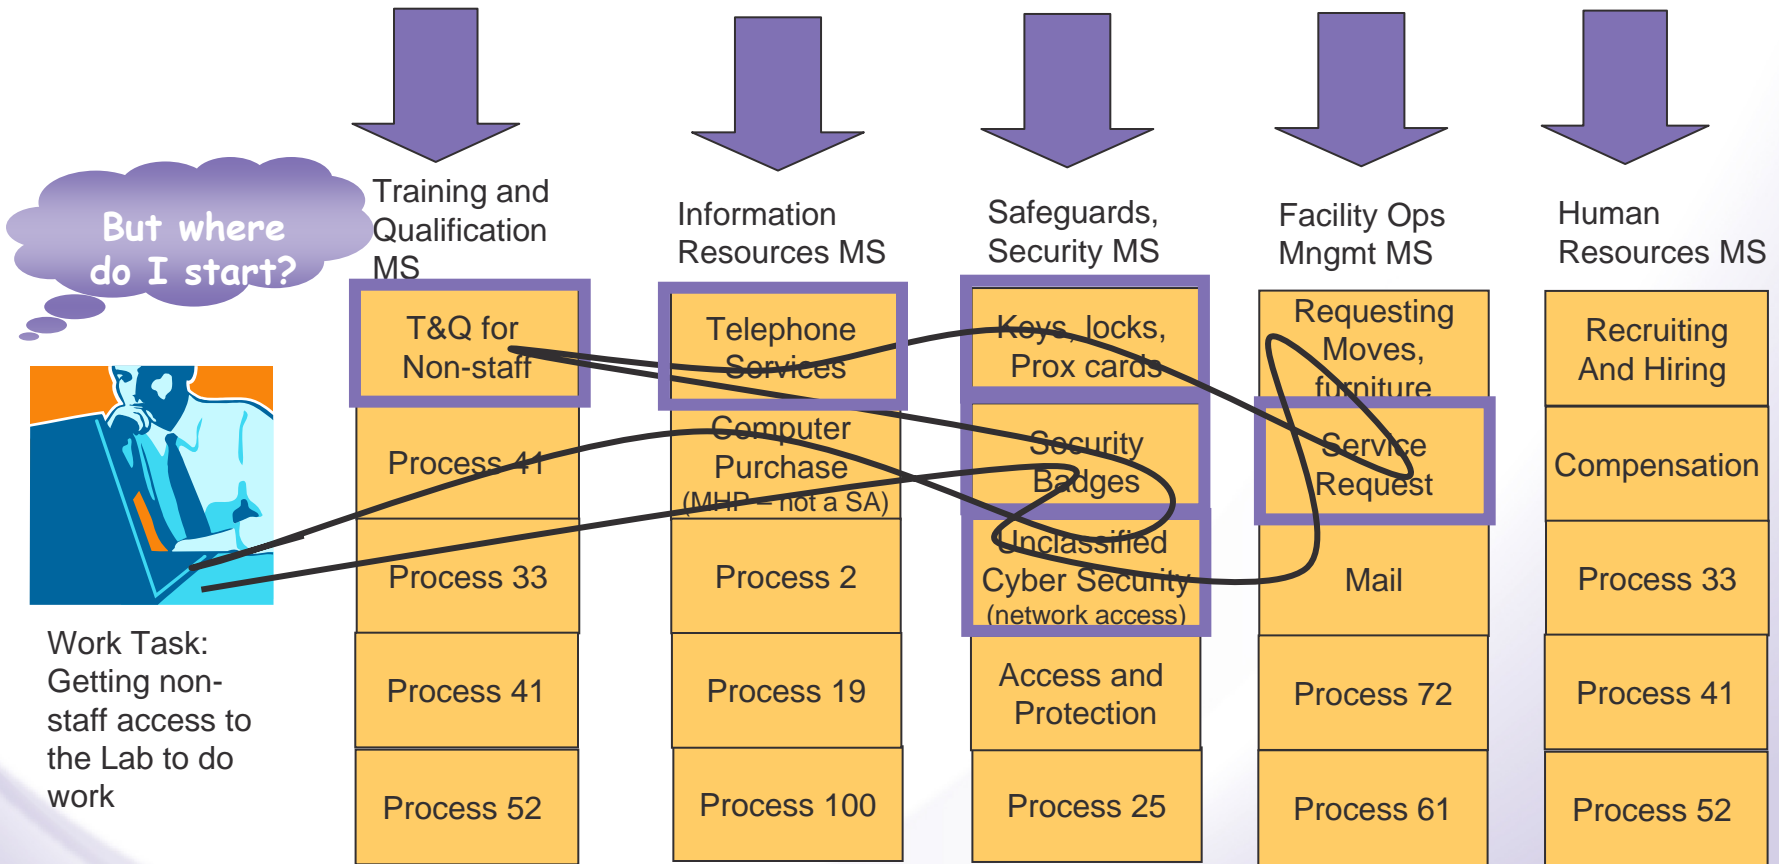

- Battelle, Columbus, OH
- Brookhaven National Laboratory (BNL), Upton, NY
- Idaho National Laboratory, Idaho Falls, ID
- National Biodefense Analysis and Countermeasures Center (NBACC), Frederick, MD
- National Renewable Energy Laboratory (NREL), Golden, CO
- Oak Ridge National Laboratory (ORNL), Oak Ridge, TN
- Pacific Northwest National Laboratory (PNNL), Pasco, WA

Current SBMS

- The current SBMS contains Management Systems (MSs) with distinct topical process areas that interpret requirements into work practice steps.....and we call them Subject Areas
- There are many different MS with numerous Subject Areas
- Topical area process steps from several MSs are integrated into an overall workflow process
- **The user** is expected to assemble the steps contained in different Subject Areas into a process.
- Assembling “workflow” this way can be confusing, inefficient, and creates risks, such as non-compliance

In reality – we link a subset of topical area process steps together to accomplish a unique work process

Topical area process steps from several MSs are integrated into an overall workflow process

Slide from P. Ruehle and M. Sours, PNNL

BPML: Expected Achievements

The Battelle Operations Council (BOC) has commissioned an initiative to develop a number of cross-cutting processes that:

- Represent Battelle's "best-practices" / a consensus approach
- Meet user's performance expectations while being compliant
- Identify and systematically address process improvement opportunities such as the removal of burdensome requirements
- Are delivered with performance goals and measures

Drive improvement in laboratory operations through an innovative delivery of common workflows.

Multi-site Pilot Project (Commissioned by BOC in June 2007)

1) Proposal Management

- How do I submit a proposal?

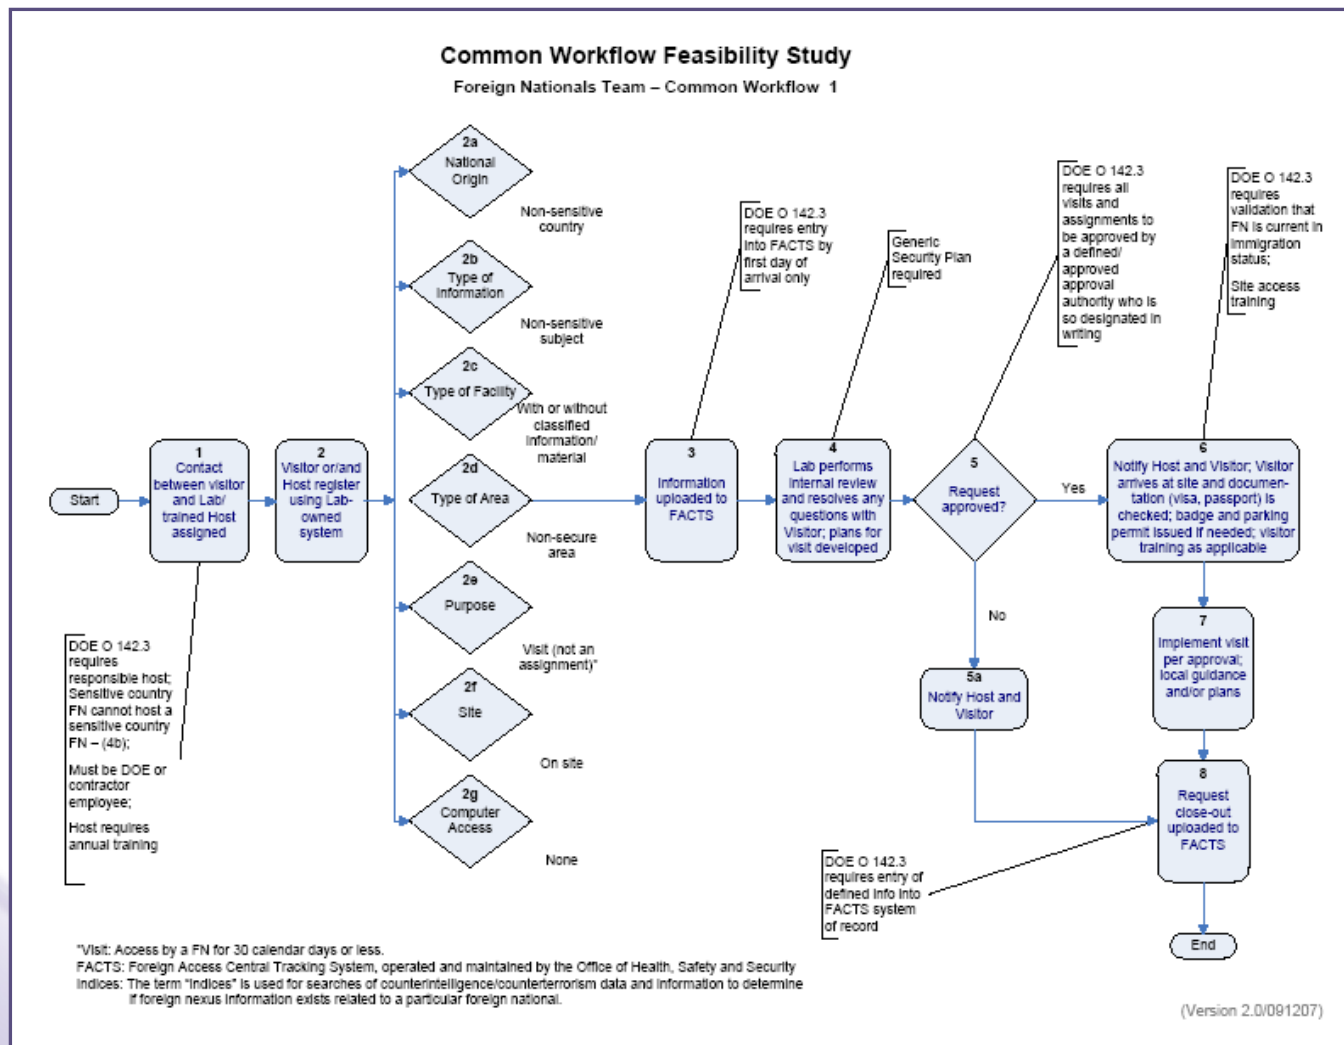

2) Foreign National Access

- How do I get a foreign national access to my site?

3) Chemical Management

- How do I eliminate excess chemicals from my lab?

Sample Process

How does a Foreign National Gain Site Access?

Process modeling started as part of the pilot project

We will continue work on this process

Proposed: 9 Four-Week Cycles are Aggressive but Reasonable Potential for addressing 18 process areas

2008

The Project Team-

Each work process development effort will be supported by a 2 person team

Participants: Users and SMEs from all seven contributing laboratories

Roles and Responsibilities of Participants of the Process Improvement Team

■ User Representatives

- Serve as empowered representatives and demanding voices for the customers and users of a process
- Formulate and communicate user needs and expectations
- Listen, participate, and team to develop a balanced consensus approach
- Work with SME participant to formulate a laboratory-specific implementation strategy

■ Subject Matter Experts

- Serve as empowered representatives for requirements implementation
- Identify, understand, and communicate requirements that bound the process
- Be aware of external influences and changes concerning your subject
- Consult with other users and SMEs at your laboratory to understand interfaces in the new, cross-cutting process
- Be open to change; listen, participate, and team to develop an improved process
- Lead the laboratory-specific effort to formulate an implementation strategy

Questions ?

Thank you for your involvement!

If you have any additional questions, please contact:
